**Subject:** Newburgh Drinking Water

Commissioners: This is to follow up on a few items related to the drinking water contamination problems in Newburgh.

1. Thank you for having Martin Brand and Dr. Nathan Graber attend last month's meeting. It was a productive meeting. Working in partnership with the City of Newburgh, a second community meeting is planned for Monday, September 19 in the evening in Newburgh. I hope that you can join us or send senior staff. As with the last meeting, EPA will provide a professional facilitator and simultaneous translation services for the meeting.

2. Basil, What is the status of the mechanism to ensure a thorough remediation of the pollution? I assume DEC is considering making this a state superfund site. As I have mentioned in the past, EPA can assist with contacting senior staff at the Dept. of Defense if that would be helpful.

3. Dr. Zucker, has a decision been made on blood serum testing? DOH provided an enormously important public service by testing blood serum in Hoosick and now Petersburg. This request came up repeatedly at the community meeting in Newburgh.

Please contact me with any additional issues or your staff can contact Pat Evangelista, EPA's point of contact on issues related to Newburgh drinking water at Evangelista.Pat@epa.gov

Thank you,

Judith
